

Caves, Coves and Cliffs - Geography Knowledge Organiser

I know and can explain what sustainability is and the steps we can take to be more sustainable. I know and can explain how to look after the environment and give reasons for why we need to do this. I know and can explain how humans have changed the environment, giving both positive and negative effects and impact. I know and can explain the issues caused by pollution. Global warming isn't good for our Earth. It means that ice is starting to melt in the Antarctic and this could cause floods in other parts of the world. Rising sea levels mean that animals, such as turtles, will no longer have nesting beaches on which to lay their eggs. We can take some simple steps to combat climate change: Reuse what you don't need any more, waste less and recycle where you can, switch off electrical items when you are not using them and walk or cycle to school.

I know where the polar regions are located.

I know the 5 oceans of the world and which continents they are located next to.

Continents

There are seven **continents**: Africa, Antarctica, Asia, **Australasia**, Europe, North America and South America. Some **continents** have many countries, others do not.

World Oceans

There are five **oceans** in the world: the Arctic Ocean, the Atlantic Ocean, the Indian Ocean, the Pacific Ocean and the Southern Ocean.

I know and can compare lives of humans living in the UK and Polar regions.

I know that Inuits live in the polar regions. I know that their life is different to ours. The Inuit live in houses, in small communities similar to villages. Each one has shops, churches and schools. A lot of Inuit people move around all year and don't stay in one single place. They make igloos out of snow and ice, as a shelter when travelling.

I know Jacques Cousteau was and why was he important. I know that he was a French naval officer, explorer, conservationist, scientist and researcher. I know he studied the sea and all forms of life in water. I know that he invented scuba equipment to allow people to explore the sea.
