

## Technology and the Physical World- Sound - Science Knowledge Organiser

**I know that sound can be used for different purposes such as alarms, communication and entertainment.** I know that there are many different purposes for sounds. Sound is used for entertainment, such as watching television and listening to music or singing. It can also be used for communication through speaking or shouting. Sound can also be used for different purposes such as alarms, doorbells and car horns.

**I know that some people can't hear and that simple technology can help us hear (such as hearing aids and vibration alerts).** I know that some people are deaf and need hearing aids to support their hearing. Those that are deaf may need support in other ways by using vibration alerts or visual alerts, such as doorbell lights.
