Y1/Y2 – Summer 1 - Science – Plants

tall taller tallest

We will be planting a **seed** and watching how it grows and changes over time.

How do plants grow?

Plants grow from seeds. Seeds come in all shapes and sizes.

What do plants need to grow?

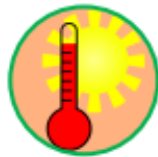

Air

Light

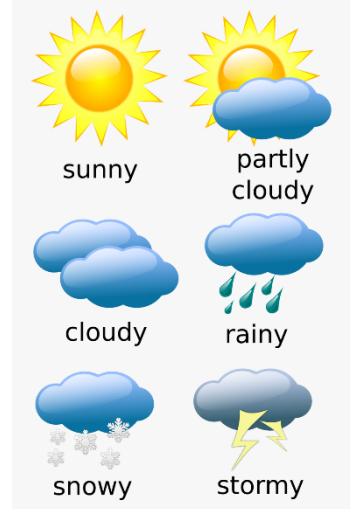

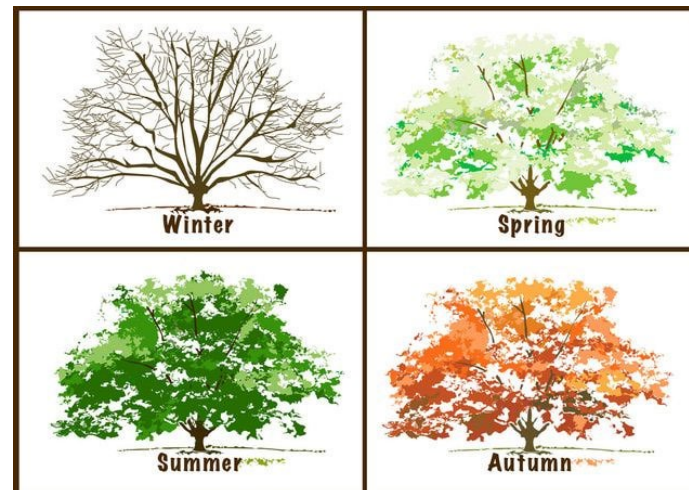

Water

Warmth

Seasons and Weather

	Natural	Found in nature and not made by people.
	Stem	Holds the plant up and transports water and food around the plant.
	Flower	The flower makes seeds for the plant.
	Leaf	Leaves make food for the plant by catching the sunlight.
	Root	The roots soak up the water and anchor the plant into the soil.
