

# Africa - Geography Knowledge Organiser

- I can locate the northern and southern hemisphere.
- I know what the tropics of cancer and the tropics of Capricorn are and where they are located.
- I know what latitude and longitude show on a map.
- I know that Egypt is in Africa and has a dry climate, a fresh water biome and a desert biome.
- I can compare the biome of Egypt with the biome of the Arctic.
- I know the River Nile is a natural resource in Egypt.
- I know that Egypt is home to a wealth of mineral resources.

## Map of Egypt in the Continent of Africa

### Longitude and Latitude

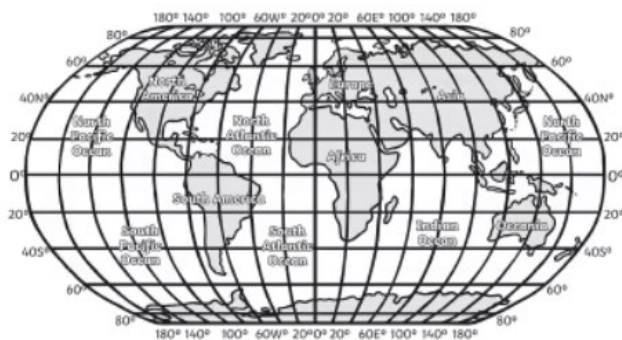

Latitude lines run around the earth east to west. These lines are the same distance apart from each other.

Longitude lines run over the top of the earth north to south. These lines are not equally distant from each other.

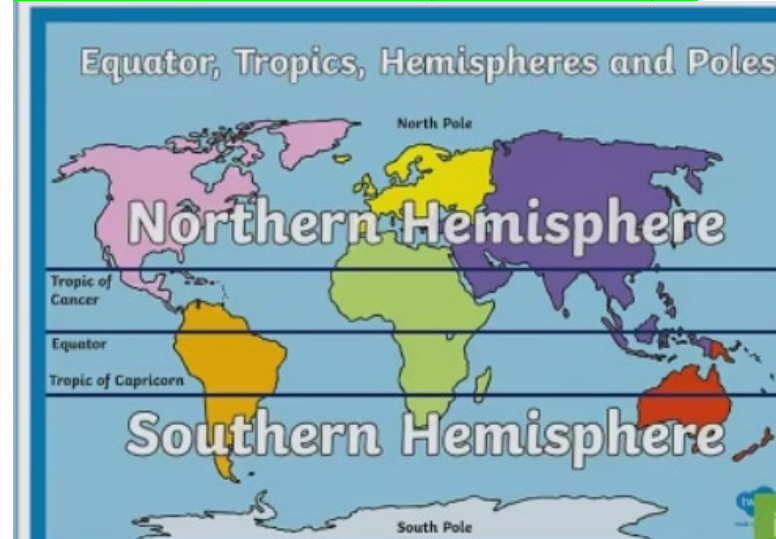

These lines are used to give the specific location of anywhere in the world using **co-ordinates**.

## LATITUDE AND LONGITUDE

### Co-ordinates

## The northern and southern hemisphere and the tropics

The River Nile in Egypt (a natural resource):

Egypt is home to a wealth of mineral resources:
